Highlights

Music and dance are perhaps the means of communication which most move the spirit of those sensitive to art, so, we have embarked on a venture with the aim of first achieving a deeper knowledge of other cultures which also have a different history to our own and which may even be made up of different attitudes to our own.

In this way we are trying to achieve our target which may be more difficult in other circumstances, through one of the arts such as music, in the strengthening of friendly links among all the countries of the world, The hope for peace and wellbeing amongst all nationalities.
