2 June to 30 June 2012

The Magic of Numbers

General introduction

In 2012, more than thirty concerts of music from middle ages to baroque will sound in performances by Czech and international musicians specialised in authentic interpretation of early music. The festival will seriously and playfully present the most important aspects of mathematics in music to discover the repercussive order and harmony.

Surrender to the musical magic of numbers in dramaturgy by Barbara Maria Willi from 2 to 30 June 2012 and sally out for exceptional experiences in charming historical venues of 20 festival towns of the Southern Moravia and Vysočina regions.
